

Education

University of Victoria <i>Honours Bachelor of Science Co-op</i>	Victoria, BC, Canada Sept. 2017 – Present
<ul style="list-style-type: none">– Major in Computer Science and Minor in Electrical Engineering.– Cumulative GPA: 8.44 / 9.00– Expected Apr. 2021	

Institute for Advanced Study, Shenzhen University <i>Bachelor of Science</i>	Shenzhen, Guangdong, China Sept. 2015 – Jun. 2017
<ul style="list-style-type: none">– Major in Physics and Biology.– Cumulative GPA: 3.76 / 4.00– Credits towards H.B.Sc. at the University of Victoria.	

Research Interests

Computer Vision • Medical Image Processing • Deep Learning
I aim to combine deep learning and medical image processing to achieve a similar and exceed the level of expert diagnosis as well as boost diagnostic speed. My ultimate goal is to predict disease before it happens based on medical images.

Research Experience

Visual Computing Group University of Victoria <i>Research Intern</i>	Victoria, BC, Canada May 2019 – Aug. 2019
<ul style="list-style-type: none">– Working on Liver Tumor Segmentation project using Deep Learning based approach.– Supervised by Professor Kwang Moo Yi.	

Undergraduate Research Opportunities Conference <i>Attendee</i>	Waterloo, ON, Canada 27 th Sept. 2018 – 30 th Sept. 2018
<ul style="list-style-type: none">– Fully funded workshop for top undergraduate students from North America to discover what graduate studies is like by working alongside faculty and current graduate students on mini-research projects and other activities at the University of Waterloo.	

Industrial Experience

EncoreFX <i>Software Developer Co-op</i>	Victoria, BC, Canada Sept. 2018 – Dec. 2018
<ul style="list-style-type: none">– Developed an online Foreign Exchange Trading and Payment platform, EncoreFX Express, using Angular and C# ASP.NET Core framework.– Created user features and interfaces for facilitating interactions, which involves designing, developing, and testing new Angular components on the front-end, as well as building and updating new RESTful API on the back-end.– Improved unit testing coverage using Jasmine, developed a Selenium test suite and researched in preventing Cross-Site Request Forgery and Cross-Site Scripting.	

Kinsol <i>Software Developer Co-op</i>	Victoria, BC, Canada May 2018 – Aug. 2018
<ul style="list-style-type: none">– Developed several responsive chatbot applications using Python Flask framework, JavaScript ES6, jQuery, and Bootstrap framework.	

- Improved Deep Neural Networks through hyper-parameter tuning, regularization and optimization for the chatbot team.
- Implemented methods which detect and recognize different objects using OpenCV in Python for the traffic analysis team.

Projects

Project Title	Keywords	Report / Demo
End-to-End Facial Expression Modifier	Conditional GAN Style Transfer Wasserstein GAN	
Segmentation of Overlapping Cervical Cells by Joint Level Set Method	Level Set Method Segmentation Pap Smear Image Analysis	

Selected Course History

Associate with the University of Victoria

Course Name	Grade	Instructor
Deep Learning for Computer Vision	A+ (94%)	Kwang Moo Yi
Medical Image Processing	A+ (95%)	Alexandra Branzan Albu
Introduction to Artificial Intelligence	A+ (90%)	Alex Thomo
Introduction to Computer Graphics	A+ (95%)	Li Ji
Optimization for Machine Learning	Continuing	Wu-Sheng Lu
Computational Geometry	Continuing	Venkatesh Srinivasan

Awards & Scholarships

Associate with the Institute for Advanced Study, Shenzhen University

- Outstanding Innovative Talent (First Prize, 2017)
- Excellent Student to Academic Performance (Second Prize, 2017)
- Huaqiang Entrance Scholarship (Second Prize, 2015)

Part-time Work

MIT Technology Review China

Editorial Intern

Remote Working
May 2019 – Present

- Translate the latest A.I. news and academic papers into Chinese.
- Demystify A.I. and explain the terminologies in plain language for the general public.
